Subject : **GLO - Request for Clarification of News Article**

Gentlemen:

This is in reply to the Philippine Dealing and Exchange Corporation's (PDEX) email of even date with respect to the publication of a news article in Business World Online entitled "Globe partners with Nokia to develop SD-WAN service". The article reported in part that:

"GLOBE TELECOM, Inc. is teaming up with Nokia's cloud business Nuage Networks to enhance its Software-Defined Wide Area Network (SD-WAN) service targeted to business customers by integrating Nokia's Virtualized Network Services (VNS).

xxx

Globe Chief Technology and Information Officer Gil B. Genio was quoted in the statement as saying, "We are excited to partner with Nuage Networks to bring the first fully operationalized SD-WAN service to the Philippines. The policy-driven automation will simplify our operations and enable us to cost-effectively expand our service footprint.

xxx"

We wish to confirm that Globe entered into a partnership with Nuage Networks from Nokia for the aforementioned service.

Thank you very much.

Very truly yours,  
Globe Telecom, Inc.
